Summary

Software Engineer pursuing a Bachelor's in Information Systems and Technology with hands-on experience in designing cloud-native architectures, microservices, and CI/CD pipelines. Developed applications using clean architecture and system design at AIBOS Uganda and interned on IT infrastructure projects at the National Environment Management Authority. Certified in Kubernetes and Oracle Cloud Infrastructure, collaborative and eager to learn in fast-paced environments.

Work Experience

AIBOS Uganda Ltd

Software Engineer

Nov 2025 - Present

Kampala, Central Region, Uganda

- Developed software applications using clean architecture and modular system design in Python
- Collaborated with cross-functional teams to design and implement microservices-based infrastructure
- Implemented CI/CD pipelines using GitOps practices to automate deployments

Makerere University

Class Representative

Aug 2023 - Present

Kampala

- Mobilized students to attend lectures which increase their understanding of different course units.
- Worked closely with the lectures to make sure that the students get a better experience during lectures.

National Environment Management Authority Uganda

Information Technology Intern

Jun 2025 - Aug 2025

Kampala

- Provided first-level IT support for hardware, software, and connectivity issues, resolving 90% of user requests independently.
- Monitored IT systems' performance, tracking incidents and ensuring timely resolutions within service level agreements.

Education

Makerere University

Bachelor, information systems and technology

Aug 2023 - Jan 2027

Kampala, Uganda

- GPA: 4.24

Skills

Software Development & Design: Software Development, Software Design, Software Infrastructure, Web Engineering, Mobile Application Development, Programming

Programming Languages: JavaScript, Python

DevOps & Cloud Infrastructure: DevOps, GitOps, Continuous Integration and Continuous Delivery (CI/CD), Kubernetes, Microservices, Cloud Computing, Cloud-Native Architecture, Serverless Computing, Server Administration

Security & Recovery: Network Security, Information Security, Disaster Recovery

Management & Leadership: Team Leadership, Risk Management

Projects

Hostel booking web application

- Developed RESTful APIs in JavaScript to handle user reservations, authentication, and payment processing with MongoDB integration
- Built a responsive frontend with React and JavaScript to enable dynamic search, booking, and user profile management
- Deployed the application on Vercel with an automated CI/CD pipeline to handle builds, tests, and production releases

Askmak Chatbot

- Developed an AI-powered chatbot for Makerere University to assist students in resolving common IT challenges and support requests
- Deployed the chatbot on a VPS to provide access to all students across the university network
- Implemented caching with Redis to reduce response times and improve overall chatbot performance

- Integrated the OpenAI API with a restricted knowledge base of university IT support content to provide accurate, contextual responses to student queries

Certifications

- LFS250: Kubernetes and Cloud Native Essentials
- Certified in Cybersecurity
- Oracle Cloud Infrastructure certification
